Professional Services

BlueSky IT Partners solves your biggest IT challenge so you can focus on the strategic issues at hand. Technology is usually not the challenge, it's people. During the pandemic and even before, we found our clients to struggle with finding talent to support new technology initiatives and the growing number of projects and demand within IT.

With our Professional Services offering, we help to add resource and knowledge gaps with on-site or virtual talent. We are also help with IT Strategy and Road mapping in all aspects of IT.

We have experience supporting organizations of various sizes—from Fortune 50 to mid-sized companies in multiple industries, including financial services, manufacturing, oil field services, banking, retail, and more. Our people-centered approach covers multiple technical disciplines to provide services ranging from as-needed support and project-based services to a seamless extension of your IT department.

End-to-end IT Consulting Solutions

Consulting + Technology Road mapping:

Create an IT strategy that aligns with your business goals and implement a framework to guide internal IT decisions.

Assessment + Planning Services:

Determine how to structure your systems, infrastructure, staffing, practices, and procedures to help you succeed now and in the future.

On-Demand Technical Resources:

Add skilled technical resources to your team on a per-project basis through our staff augmentation services.

Technical Design Services:

Get into the details of how all the hardware and software work in your system to ensure that nothing is left to chance.

Technical Project Management:

Provide interim project management resources to help you scale up or down as needed for added flexibility without the overhead.

Global IT Technicians:

Offer IT techs that perform install and break-fix for any IP device. Also perform cabling site surveys, heat mapping and asset management.

Desktop Support:

Eliminate the need for software maintenance, streamline equipment purchasing, and simplify workstation management.

PMO as a Service:

Build out your project management office (PMO) with a fixed monthly cost for predictability and consistency.

Fractional CIO Service:

Align your IT strategy with your business objectives to maximize value without hiring a full-time CIO.

We Turn Blue Sky Thinking into Tangible Business Outcomes

Here are some recent projects we have successfully deployed for our clients:

o New data center build-out: Offered solution development, project management, and handover to operations.

o Trading facility build-out (20,000 sq. ft): Provided requirements capture, solution development, and handover to operations.

o 120-site SD-WAN deployment: Project-managed the multi-site deployment of SD-WAN appliances with internet circuits.

o Migration of on-prem data archive to co-location facility with HyperFlex solution and Azure ExpressRoute: Identified requirements, developed the solution, and managed delivery and handover to operations.

o IVR and Call Center Upgrade: Facilitated requirements gathering, IVR implementation and call center upgrade, and handover to operations.
